

KAPSPETTS HYDRAULIC GROOMING TABLE

KAPSPETS HYDRAULIC GROOMING TABLE

KAPS HYDRAULIC GROOMING TABLE

Elevate Your Pet Grooming Experience
Premium Quality | Sturdy | Adjustable | Easy to Use

Perfect for Professional Pet Groomers / Pet Salons & Spas / Veterinary Clinics /
Home Grooming & Small, Medium to Large Breed.

- ❖ An electric actuator from make in India.
- ❖ Top class linear actuator provides outstanding loading capacity of 100kg.
- ❖ Foot Control pedals for the electric lifting.
- ❖ Uses advanced linear motor, lift freely and low noise. The gentle movement up/down does not startle pets.
- ❖ Power points for clipper and nail grinder.
- ❖ Non-Slip Surface : Textured rubber mat ensures your dog stays secure and comfortable.
- ❖ Waterproof and stain-resistant surfaces make maintenance a breeze.
- ❖ Includes drawer for small handy grooming kits.
- ❖ The power supply system is protected by a top class breaker with leakage detector included too.
- ❖ Secure Grooming Arm: Includes an adjustable arm and noose to keep your dog safely in place.
- ❖ Durable Construction: Made from high-quality, rust-resistant materials for long-lasting use.
- ❖ Hanging hooks on the other side of tabletop keeps all your equipment (nail grinder, clipper and dryers).
- ❖ Adjustable Arm - The adjustable H-shaped arm. Its maximum height is 38 inches from the table. There are rotary knobs on the frame, which are easy to set, lock and adjust.
- ❖ Innovative X-style frame is stable, powerful and quiet.
- ❖ Professional Quality: "Invest in a durable and reliable table built to withstand the demands of daily grooming. Crafted with high-quality materials for long-lasting performance."

- ❖ **Materials:** Premium MS with structure powder coated.
- ❖ **Dimensions :** 50L x 27W x 41H inches / Max Load: 100 kg
- ❖ **Height adjustment range :** 11" to 40"
- ❖ **Color -** Black, Green, Blue, Pink, Purple, Brown or else customise your colour as per your interior.

MS vs GI

UNDERSTAND THE DIFFERENCE. CHOOSE THE BEST.

MS (Mild Steel) and GI (Galvanized Iron) are both widely used in various applications, but they differ in composition, properties, and performance.

MS (MILD STEEL)

COMPOSITION

Made of iron and carbon.
No protective coating.

CORROSION RESISTANCE

Low resistance to corrosion.
Prone to rust when exposed to moisture.

STRENGTH & DURABILITY

High strength and durability.
Suitable for heavy load applications.

SURFACE FINISH

Plain surface. Requires painting or coating for protection and better appearance.

MAINTENANCE

Requires regular maintenance to prevent rust and corrosion.

COST

Generally lower initial cost compared to GI.

APPLICATIONS

Used in structural applications, machinery, automotive parts, and general engineering.

KEY DIFFERENCES

COMPOSITION

CORROSION RESISTANCE

STRENGTH & DURABILITY

SURFACE FINISH

MAINTENANCE

COST

APPLICATIONS

COMPOSITION

Mild steel coated with a layer of zinc.

CORROSION RESISTANCE

High resistance to corrosion due to zinc coating.

STRENGTH & DURABILITY

Good strength with added protection. Suitable for outdoor use.

SURFACE FINISH

Smooth, shiny zinc-coated surface. No need for painting.

MAINTENANCE

Low maintenance. Longer life with minimal care.

COST

Slightly higher initial cost than MS.

APPLICATIONS

Used in roofing, fencing, pipes, automotive, appliances, and outdoor structures.

QUICK SUMMARY

Choose MS for strength and affordability in indoor or dry environments.
Choose GI for corrosion resistance and durability in outdoor or moist conditions.

X-FRAME DESIGN FACTOR

- **Structure:** Uses a scissor-like mechanism (nX" shape) to lift and lower table. Is over-engineered by 20–30% to handle dynamic loads. Provides the weight of dogs (up to 50–100 kg capacity).
- **Stability:** Generally provides excellent stability to base and even weight distribution.
- **Adjustability:** Offers smooth height adjustment, making is table or the desired height.
- **Space Efficiency:** The X-frame design tends to ta te up more space under the table, which can be a drawback in smaller grooming salons or tight spaces.
- **Durability:** Known for being robust an especially when made with high-quality materials.
- **Ease of Use:** Typically requires less effort to operate compared to manual systems, but the hydraulic mechanism may need occasional maintenance.
- **Weight Capacity:** Usually supports higher weight, suitable for larger dogs or heavy-duty use.
- **Standard Thickness:** Kaps hydraulic dog groom- tables (2 mm) steel for X-frames.
